**North American Tungsten Files Technical Report for Cantung Mine – Life of Mine  
Extended Beyond 2017**

Vancouver, BC - North American Tungsten Corporation Ltd. (TSX.V: NTC) ("NTC" or "the Company") announces that the Company has filed a Technical Report entitled "Technical Report on the Cantung Mine, Northwest Territories, Canada" dated September 19, 2014 (the "Report"). The Report was prepared in compliance with National Instrument 43-101 – *Standards for Disclosure for Mineral Projects* and may be found under the Company's profile on SEDAR at [www.sedar.com](http://www.sedar.com).

The Report supports the disclosure contained in the Company's press release of September 19, 2014, which announced that estimates of mineral reserves and resources had increased. The updated reserves and resources support an extended mine life beyond 2017, the report confirmed. Since that last update of 2011, NTC has extracted more than 1.4 million tons of ore at Cantung, yet probable reserve estimates have increased from the 1.69 million tons reported then to the current estimate of 1.82 million tons.

**ABOUT NORTH AMERICAN TUNGSTEN CORPORATION LTD.**

The Company is a publicly listed Tier 1 Junior Resource Company engaged primarily in the operation, development, and acquisition of tungsten and other related mineral properties in Canada. The Company's 100% owned CanTung mine and MacTung development project make it one of the few tungsten producers with a strategic asset in the western world. MacTung is one of the world's largest known undeveloped high grade tungsten-skarn deposits.
